IBFS File Nos. SAT-PPL-20091208-00142, SAT-APL-20100219-00034
Call Sign S2802
June 4, 2010

The Petition for Declaratory Ruling filed by New Skies Satellites, B.V. (New Skies), IBFS File No. SAT-PPL-20091208-00142, as amended by SAT-APL-20100219-00034, is granted.¹ Accordingly, New Skies' in-orbit NSS-5 space station (Call Sign S2802), licensed by the Netherlands, is added to the Permitted Space Station List (Permitted List) and each U.S.-licensed earth station with "ALSAT" designated as a point of communication is granted authority to provide Fixed-Satellite Services (FSS) in the 3700-4200 MHz (space-to-Earth) and 5925-6425 MHz (Earth-to-space) frequency bands to, from, or within the United States, by accessing the NSS-5 space station at the 20° W.L. orbit location, subject to the parameters set forth in its earth station license. These operations must be in accordance with the terms, conditions and technical specifications set forth in New Skies' petition, the Federal Communications Commission (Commission) rules not waived herein, and the following conditions:

1. NSS-5 is not authorized to provide any Direct-to-Home (DTH) service, Direct Broadcast Satellite (DBS) service, or Digital Audio Radio Service (DARS) to, from, or within the United States.

2. Communications between U.S.-licensed earth stations and the NSS-5 space station shall be in compliance with all existing and future space station coordination agreements reached between the Netherlands and other administrations.

3. New Skies' request for waiver of Section 25.202(g) of the Commission's rules, 47 C.F.R. § 25.202(g), is granted, as conditioned. Section 25.202(g) requires "telemetry, tracking and telecommand (TT&C) functions for U.S. domestic satellites shall be conducted at either or both edges of the allocated band(s). Frequencies, polarization and coding shall be selected to minimize interference into other satellite networks and within their own satellite system." New Skies proposes to place its TT&C in the center of the standard C-band. This waiver grant is based upon findings that there is currently no potential for harmful interference from TT&C operations in the center of the C-band, the use of which has already been coordinated for Intelsat 603, and thus would not present a different interference situation to neighboring satellites or require additional coordination, and that there would be an undue hardship to customers if they were required to reconfigure existing antennas to operate at the edges of the C-band. As a condition of this waiver, New Skies must accommodate future space station networks that are compliant with Section 25.202(g). Further, New Skies must operate the C-band frequencies of NSS-5 pursuant to any existing or future coordination agreements for this location.

4. New Skies' request for waiver of Section 25.210(a)(1) of the Commission's rules, 47 C.F.R. 25.210(a)(1) is granted, as conditioned. Section 25.210(a)(1) requires that C-band operations use orthogonal linear polarization. New Skies employs circular polarization. This waiver grant is based upon findings that there is currently no potential for harmful interference from operations at this location with circular polarization, and that there would be an undue hardship to customers if they were required to reconfigure existing circularly-polarized antennas to operate with linear polarization. As a condition of this waiver, New Skies must accommodate

¹ Intelsat North America LLC has separately filed an application for authorization to operate Ku-band frequencies on the NSS-5 space station at the 20° W.L. orbital location. See IBFS File No. SAT-A/O-20091208-00141 (granted June 4, 2010).

future space station networks that are compliant with Section 25.210(a)(1). Further, New Skies must operate NSS-5 pursuant to any existing or future coordination agreements for this location.

5. New Skies' request for waiver of Section 25.210(a)(3) of the Commission's rules, 47 C.F.R. 25.210(a)(3) is granted, as conditioned. Section 25.210(a)(3) requires FSS space stations using the C-band to be capable of switching polarization sense upon ground command. The Commission requires polarity-switching capability for two reasons: 1) to provide U.S.-licensed space stations with the flexibility to operate at different orbital locations, and (2) to mitigate potential interference between adjacent fixed space station systems transmitting analog television signals. Telesat Canada, Petition for Declaratory Ruling for of Inclusion of ANIK F3 on the Permitted Space Station List, *Order*, 22 FCC Rcd 588 (para. 10) (Int'l Bur., Sat. Div. 2007). This waiver grant is based upon a finding that the ability to switch polarization is not currently necessary to protect other space stations at adjacent orbital locations from harmful interference, because the NSS-5 space station's operations will be in compliance with existing coordination agreements. As a condition of this waiver, New Skies must accommodate future space station networks that are compliant with Section 25.210(a)(3). Further, New Skies must operate NSS-5 pursuant to any existing or future coordination agreements for this location.

6. New Skies' request for waiver of Section 25.211(a) of the Commission's rules, 47 C.F.R. 25.211(a), is granted, as conditioned. Section 25.211(a) provides that downlink analog video transmissions in the C-band shall be transmitted only on a center frequency of $3700+20N$ MHz, where $N=1$ to 24, with corresponding uplink frequencies 2225 MHz higher. This waiver grant is based upon findings that New Skies designed the NSS-5 space station using the same analog TV center frequencies traditionally used by Intelsat space stations and legacy customers now using New Skies' space stations, and that existing analog video operations at the 20° W.L. orbital location are fully coordinated and will not cause interference to adjacent space station operators. As a condition of this waiver, New Skies must accommodate future space station networks serving the United States that are compliant with Section 25.211(a). Further, New Skies must operate NSS-5 pursuant to any existing or future coordination agreements for this location.

7. This grant of market access will terminate in the event that the NSS-5 space station is either relocated from the 20° W.L. orbital location, or ceases to operate. In either case, NSS-5 will be removed from the Permitted List. If New Skies wishes to continue to provide service to the U.S. from the 20° W.L. orbital location using another space station, it must file a new application to have that space station placed on the Permitted List.

8. New Skies is afforded thirty days from the date of release of this action to decline this grant as conditioned. Failure to respond within this period will constitute formal acceptance of the grant as conditioned.

9. This action is taken pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 or applications for review under Section 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106, 1.115, may be filed within 30 days of the date of the public notice indicating that this action was taken.

New Skies Satellites B.V. (doing business as 'SES WORLD SKIES') seeks a Petition for
Declaratory Ruling to add NSS-5 to the Permitted Space Station list at the 20.0 W.L.U.
orbital location.

Narrative

43a. Geographic Service Rule Certification

By selecting A, the undersigned certifies that the applicant is not subject to the geographic service or geographic coverage requirements specified in 47 C.F.R. Part 25.

A

B

C

By selecting B, the undersigned certifies that the applicant is subject to the geographic service or geographic coverage requirements specified in 47 C.F.R. Part 25 and will comply with such requirements.

By selecting C, the undersigned certifies that the applicant is subject to the geographic service or geographic coverage requirements specified in 47 C.F.R. Part 25 and will not comply with such requirements because it is not feasible as a technical matter to do so, or that, while technically feasible, such services would require so many compromises in satellite design and operation as to make it economically unreasonable. A narrative description and technical analysis demonstrating this claim are attached.

CERTIFICATION

The Applicant waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. The applicant certifies that grant of this application would not cause the applicant to be in violation of the spectrum aggregation limit in 47 CFR Part 20. All statements made in exhibits are a material part hereof and are incorporated herein as if set out in full in this application. The undersigned, individually and for the applicant, hereby certifies that all statements made in this application and in all attached exhibits are true, complete and correct to the best of his or her knowledge and belief, and are made in good faith.
